

SONNY BOY FUENTEBLANCA

Full Stack Developer (React / Node / NestJS)

09635688439 | fuenteblancaSonny@gmail.com | github.com/fsonnyboy | linkedin.com/in/sonny-boy-fuenteblanca

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer specializing in modern web and mobile application development using React.js, Next.js, NestJS, and PostgreSQL. Skilled in building scalable APIs, optimizing performance, and delivering responsive user experiences. Demonstrated success improving API response times by up to 80% and implementing caching systems that enhance scalability and reliability. Adept at working in agile teams, with growing expertise in backend engineering and automation.

CORE TECHNICAL SKILLS

Frontend: React 19, Next.js 15, TypeScript, Tailwind CSS, React Router, Framer Motion

Backend: Node.js, NestJS, Express.js, Prisma ORM, PostgreSQL, Redis

Mobile: React Native, Expo, Recoil, React Query, NativeWind

Tools & DevOps: Git, Vercel, REST APIs, JWT, bcrypt, AsyncStorage, Expo Secure Store

Other: Agile, CI/CD, AI Automation, Performance Optimization

PROFESSIONAL EXPERIENCE

Quantum Technologies Inc.

Associate Software Engineer (Backend) | May 2025 – October 2025

- Developed and maintained NestJS-based APIs for a social media platform serving thousands of users.
- Implemented Redis caching, reducing server response times by 80% and improving user experience.
- Built AI automation workflows that streamlined internal moderation tasks and boosted operational efficiency.
- Collaborated cross-functionally in an Agile setup to deploy scalable backend systems and enhance reliability.

Key Achievements:

- Enhanced API throughput and latency performance via distributed caching strategies.
- Designed robust authentication and session management improving system security.

Digital Transformation Corporation

Junior Frontend Developer | August 2023 – May 2025

- Contributed to two full-stack projects — a productivity tracker similar to Toggl and a mobile application built with React Native and Expo.
- Developed modern, responsive UIs using React.js and Next.js integrated with backend APIs for seamless functionality.
- Improved user engagement by implementing real-time data synchronization and optimized rendering workflows.
- Participated in Agile sprints, code reviews, and debugging to ensure maintainable and scalable codebases.

Key Achievements:

- Delivered cross-platform solutions across web and mobile, ensuring design consistency and performance parity.
- Strengthened product quality by contributing to end-to-end feature delivery in collaboration with backend teams.

PROJECTS

Kalooban – Mental Health Platform

Next.js, React 19, TypeScript, Prisma ORM, PostgreSQL, Anthropic Claude AI, TanStack Query, Tiptap, Recharts

Built a multi-app Filipino mental health platform spanning a user web app, therapist dashboard, admin dashboard, and a React Native mobile app. User features include an anonymous community feed with post types (Share/Vent/Confession), reactions and replies, an SOS modal for crisis support, a Tiptap-powered journal with AI-generated prompts in Filipino and English (Anthropic Claude), breathing exercises (box/4-7-8/grounding), and mood tracking with trend charts. Implemented topic-based support rooms with polling-based messaging, an AI buddy-matching system with persistent chat, and full auth with email verification and password reset. Admin dashboard covers moderation queues (post flags, room reports, user reports, crisis alerts), user management (ban/suspend/restore), therapist verification, analytics (mood trends, crisis events, therapist activity) with Recharts, payout oversight, audit logging, and 2FA login. Therapist dashboard covers booking lifecycle management, availability scheduling, session rates, payouts, and PRC verification upload.

City Marketplace

Next.js 16, React 19, TypeScript, Prisma ORM, PostgreSQL, Tailwind CSS, Radix UI, TanStack Query, Framer Motion, Zod

Developed a city-scoped buy-and-sell marketplace platform where users are geo-tied to their city. Implemented full auth with bcrypt hashing and role-based access (User, Moderator, Admin). Features include category-filtered listings with image carousels, negotiable pricing, new/used condition tags, listing view tracking, in-app buyer-seller messaging per listing, listing boosts (Basic/Standard/Premium plans), user subscriptions, GCash/Maya payment processing, user ratings, report/moderation system, and a seller dashboard for listing management (create, edit, delete). Supports dark mode via next-themes.

StayWise – Property Management System

React Router v7, React 19, TypeScript, Prisma ORM, PostgreSQL, JWT, Tailwind CSS, Framer Motion

Built a comprehensive dual-role property management platform for homeowners and tenants. Implemented multi-role JWT authentication with session management, bcrypt password hashing, and protected route guards. Homeowner features include property and unit CRUD with amenities, geo-coordinates, and image galleries; rent payment tracking (paid, overdue, partial); expense management by category; document storage (lease agreements, inspection reports, tax documents); utility tracking with meter readings; tenant application screening with credit, employment, and income verification; and an analytics dashboard. Tenant features include property search, maintenance request submission with priority levels and photo uploads, in-app messaging with reply threading, and a notifications system.

<https://staywise-ten.vercel.app>

Medicare Mobile

React Native, Expo Router, TypeScript, Recoil, TanStack Query, NativeWind, Formik, Yup, Expo Secure Store

Built a healthcare mobile app for browsing OTC and prescription medicines by category, viewing medicine details, and submitting order requests. Implemented account status polling (Pending/Approved/Rejected) with real-time alerts, age-aware prescription validation, cart management, order history, and a concerns/feedback system with Formik and Yup validation. Secured authentication via Google Sign-In with Expo Secure Store for token persistence and AsyncStorage for offline data.

EDUCATION

Bachelor of Science in Information Technology

Northwest Samar State University — 2023

ADDITIONAL INFORMATION

- Passionate about digital innovation, scalable architectures, and automation.
- Active on GitHub and continuously learning emerging web and AI technologies.
